UPDATED COLOURS & VISUALS ON ALL ION & ZED BINDINGS

- Black anodized aluminum toes on ION 12, ION 10, ZED 12
- Black carbon-infused nylon toe on ZED 9
- Black heels with simplified graphics to let the industrial design speak for itself
- Signature ION orange and ZED green for easy identification and consistent brand visual language
- Black components including brakes and screws to bring it all together

IMPROVED TAILS ON MINIMIST & ESCAPIST SKINS

- Sizing holes added to the tail straps of MINIMIST and ESCAPIST skins to improve the user experience
- Functionality similar to the tried and true ALPINIST+ tail strap
- Shared tail clip design across all G3 ski skins
- Eliminates slippage thanks to the mechanical design
- Maintains the ultra lightweight design and materials

PFC-FREE WATER REPELLENCY ON ALL SKINS

- We introduced PFC-free (perfluorocarbon) water repellency in our nylon skins in 2020
- After extensive research, testing, and iterations we are excited to launch all our mohair and momix skins to offer the same level of environmental stewardship without sacrificing performance
- The PFC-free repellency embeds itself into the fibres and wraps around every thread in the plush for superior protection and durability
- Better for the environment and for everyone who handles the skins by eliminating harmful C6 and C8 chemicals

SKIN SAVERS INCLUDED

- 90mm skin savers included with all skins

Trim Tool & Skin Savers Included

NEW PLANT-BASED SKIN WAX

- Rub-on wax for application in the field in warm and variable snow conditions to repel water and prevent icing/clumping
- Includes eco wax, scraper, and zippered storage bag

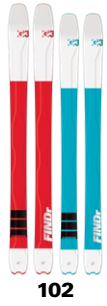

MORE PACKABLE ALUMINUM PROBES

- New aluminum probes are just 47 cm long when packed, making them easy to fit in any pack
- The all-new SPEED 280 is the ideal medium length probe for everyday adventures

GEAR SPECIFICALLY DESIGNED FOR AND TAILORED TO SMALLER BACKCOUNTRY USERS

This is not a "female series", a "youth series", or a "beginner series". SWIFT gear is technical and suitable for any gender. Every detail in this collection of high performance equipment is dialed in for smaller adults and youth looking to push the limits of what they can accomplish in the backcountry.

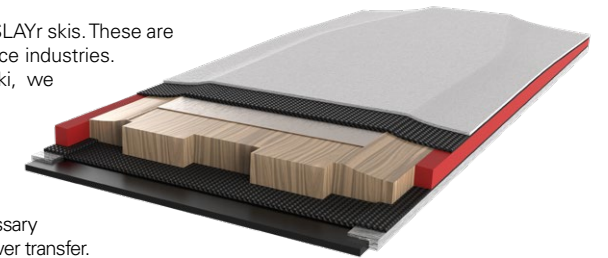

PREMIUM CARBON FIBRE CONSTRUCTION

G3 uses only premium carbon fibre laminates in the FINDr, SEEKr, and SLAYr skis. These are the same 100% multi-directional stitch bonded fabrics used in aerospace industries. To optimize the flex, rigidity and power transfer specific to each ski, we meticulously engineer every layer of carbon above and below the core.

WET VS. DRY LAYUP

G3 starts with dry and flexible sheets of carbon fibre for each ski. This allows us to use exactly the right amount of resin for each ski's size, weight, and the amount of carbon laminate. Our process minimizes unnecessary resin weight and maximizes the carbon's contribution to flex, rigidity and power transfer.

WHY G3? | SKIS

There is a lot of cool technology and engineering that goes into our skis. But the real story behind G3 skis is why we make them in the first place - every decision we make and material we use is designed to make ski touring even better than it already is. We strive for that ideal balance of uphill and downhill performance, and the proof in all of this comes when you get out and just ski 'em.

MAGNETIC CONTACT POINTS

Introduced with the FINDr, the G3 ski line-up is now magnetic at both the tip and tail contact points to hold your skis together without a strap for faster transitions and less fiddle. The idea started as a way to make technical transitions more efficient for ski mountaineers, but we soon found the benefits extended to include general movement around the mountain - at the base, in the van or the roof box, and eliminating the scissoring that is so common with Jerrys everywhere.

Seriously, get your hands on a pair and try it out.

PU SIDEWALLS IN ALL SKIS

WHAT IS POLYURETHANE?

Polyurethane (or PU) is an elastomeric polymer material known for its energy absorption, durability, and elasticity. It is commonly used in skateboard wheels and racecar bushings to make for a smoother ride.

NO MORE CHATTER

An inherent problem with carbon and ultralight touring skis is chatter, due to the light and stiff materials used. PU sidewalls counteract this chatter by absorbing that extra energy and creating a more damp ride overall.

DURABILITY & VERSATILITY

The elasticity of PU increases durability by 30% improving protection from sidewall impact when compared to ABS. Using PU in ski construction also allows for a permanent bond to the wood core and a seamless sidewall.

BUILT TO LAST

MATERIALS THAT CAN HANDLE THE ABUSE OF BACKCOUNTRY SKIING

Durability and performance are paramount to the G3 design, and we don't hold back on crucial materials in order to save weight. Hardened corrosion resistant alloy steel edges featured in G3 skis allow for extreme durability and integrity through multiple tunes.

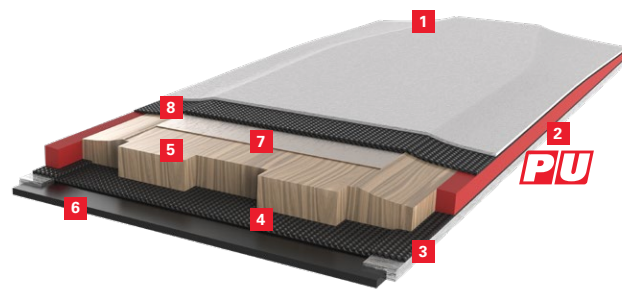

FULL THICKNESS BASES

While other ski manufacturers may use thinner bases to cut weight, G3 utilizes full thickness bases for optimal performance in the field. Thicker bases allow multiple tunes to maximize the performance of the ski throughout the life of the product. More importantly, these bases are far less susceptible to impact damage from hidden rocks and other obstacles.

FINDr

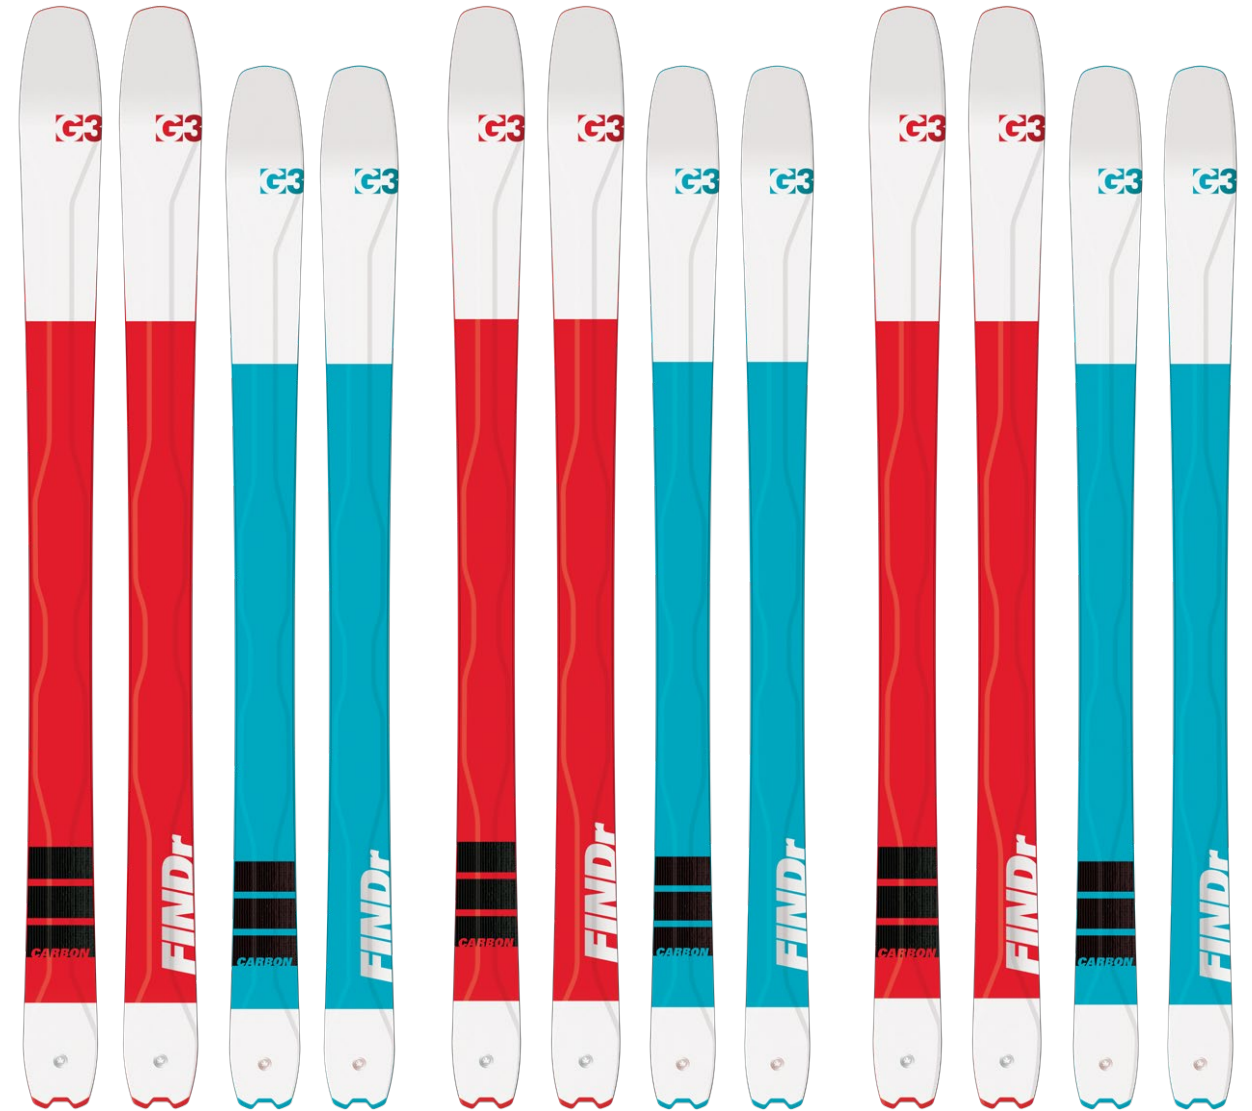

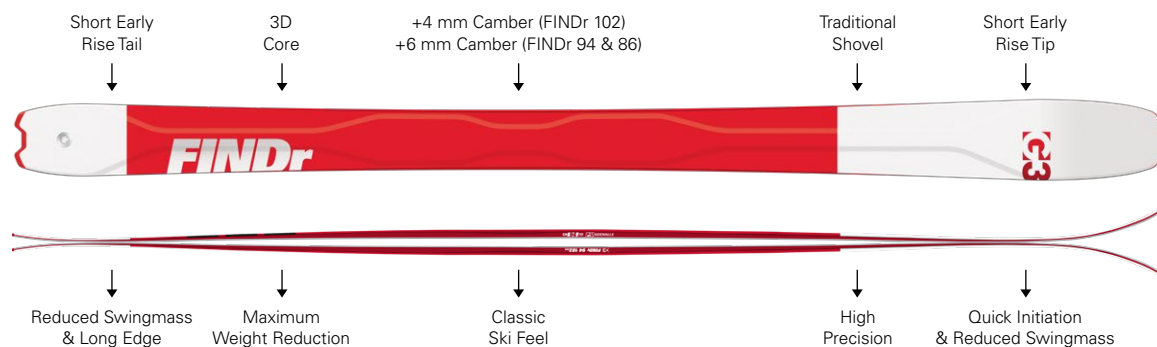

- Polyurethane sidewalls for best-in-class dampness **PU**
- Magnetic contact points speed up bootpack transitions and eliminate the need for a strap when shouldering **M**
- Modern ski built for precision in steep and technical terrain
- Uncompromised performance and versatility in all conditions
- Full carbon fibre construction

- 1 Super light textured nylon topsheet - durable & sheds snow/ice
- 2 PolyUrethane sidewall - durability & dampness
- 3 Lightweight hardened steel edges - corrosion & dent resistant
- 4 2 layers of carbon fibre, triaxial stitched - strong, light & torsionally stable
- 5 3D shaped Poplar Paulownia wood core - light & high performance
- 6 Full thickness base - durable, long-lasting & fast
- 7 Titanal aluminum mounting plate - mount integrity & dampness
- 8 2 layers of carbon fibre, quadraxial stitched - strong, light & torsionally stable

TRADITIONAL CAMBER WITH EARLY RISE

Built to excel in ski mountaineering applications, hard and mixed snow conditions, and to give maximum edge control, the FINDr features a traditional camber profile. This true alpine touring ski includes an early-rise tip to give additional float in deep snow.

FINDr 102

This freeride-inspired ski balances weight and edge hold with a damp and powerful ride. The FINDr 102 is light but strong and is exceptionally fun to ski anything from soft snow to hardpack conditions.

133 / 102 / 120 mm						
SIZE:	-	-	174 cm	179 cm	184 cm	189 cm
SW/TA	164 cm	169 cm	174 cm	-	-	-
RADIUS:	18.6 m	20.0 m	21.4 m	22.6 m	23.9 m	25.2 m

SEEK_r

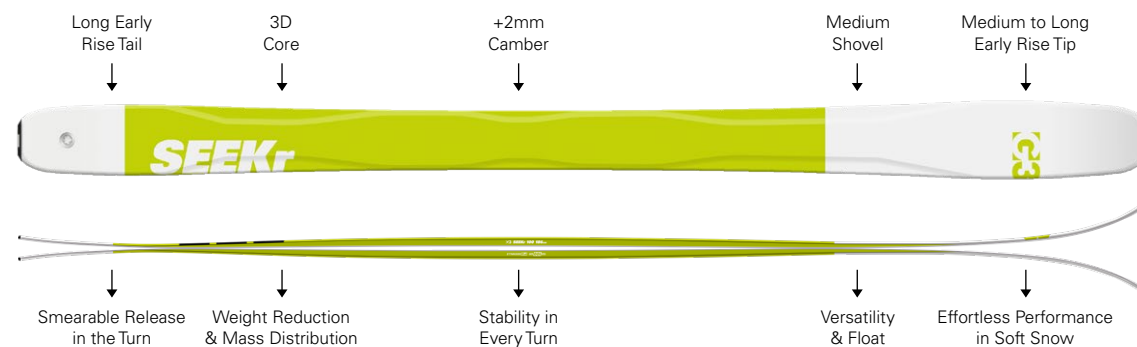

- Super light and playful backcountry ski
- Polyurethane sidewalls for best-in-class dampness **PU**
- Magnetic contact points hold skis together without a strap for faster transitions and less fiddle **LM**
- Full carbon fibre construction creates a strong, light and torsionally stable ski
- Modern, all-mountain shape and profile for versatility

- 1 Super light textured nylon topsheet - durable & sheds snow/ice
- 2 PolyUrethane sidewall - durability & dampness
- 3 Lightweight hardened steel edges - corrosion & dent resistant
- 4 2 layers of carbon fibre, triaxial stitched - strong, light & torsionally stable
- 5 3D shaped Poplar Paulownia wood core - light & high performance
- 6 Full thickness base - durable, long-lasting & fast
- 7 Titanal aluminum mounting plate - mount integrity & dampness
- 8 2 layers of carbon fibre, quadraxial stitched - strong, light & torsionally stable

SLIGHT CAMBER WITH EARLY RISE

Built to be playful in the turn while remaining stable in variable conditions. The longer early rise in the tip and tail allows for smearability while the slight camber underfoot maintains stability and inspires confidence at speed.

SEEK_r 110

Lightest for its size and more playful than ever, the SEEK_r 110 crushes vertical for breakfast then feasts on all-you-can-eat powder until your tailgate apres session calls.

	139 / 110 / 127 mm			
SIZE:	164 cm	172 cm	180 cm	188 cm
SWIAT	164 cm	172 cm	-	-
RADIUS:	16.4 m	18.2 m	19.9 m	21.7 m
WEIGHT: (single)	1.39 kg / 3 lb 1 oz	1.46 kg / 3 lb 3 oz	1.55 kg / 3 lb 7 oz	1.62 kg / 3 lb 9 oz

SEEK_r 100

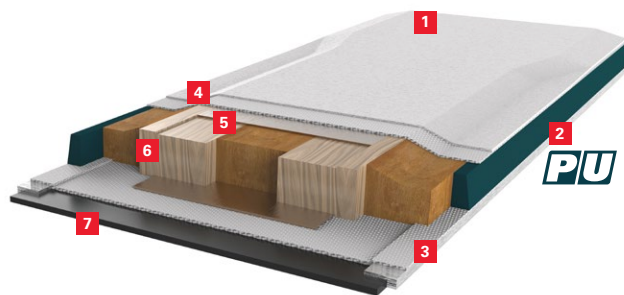

Ridiculously light and agile, the SEEK_r 100 redefines backcountry performance and dare we say pleasure in that all-mountain sweet-spot of 100 mm underfoot.

	132 / 100 / 120 mm				
SIZE:	-	162 cm	170 cm	178 cm	186 cm
SWIAT	154 cm	162 cm	170 cm	-	-
RADIUS:	12.6 m	14.5 m	16.4 m	18.3 m	20.2 m
WEIGHT: (single)	1.26 kg / 2 lb 12 oz	1.33 kg / 2 lb 15 oz	1.39 kg / 3 lb 1 oz	1.46 kg / 3 lb 3 oz	1.54 kg / 3 lb 6 oz

ROAMr

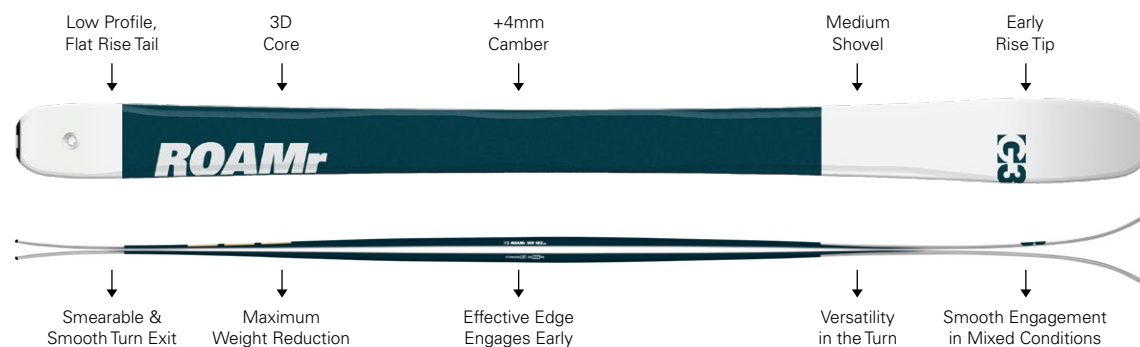

- Lightweight all-mountain ski
- Polyurethane sidewalls for best-in-class dampness **PU**
- Magnetic contact points hold skis together without a strap for faster transitions and less fiddle **LM**
- Two tip-to-tail layers of titanal aluminum for dampness and power in every turn
- One ski quiver built to ski in and out of bounds with ease

- 1 Textured co-extruded nylon topsheet - durable & sheds snow/ice
- 2 PolyUrethane sidewall - durability & dampness
- 3 Full thickness hardened steel edges - corrosion & dent resistant
- 4 Triaxial glass - torsion, flex & value
- 5 7000 series Titanal aluminum sheets - dampness & power
- 6 3D shaped Poplar Paulownia wood core - light & high performance
- 7 Full thickness base - durable, long-lasting & fast

MEDIUM CAMBER WITH EARLY RISE

The low profile early rise tip, just the right amount of camber underfoot, and flat rise tail give these skis a long effective edge and a smearable, smooth turn. This versatile, all-mountain performer floats like a longer ski and retains the fun of a shorter ski.

ROAMr 108

This freeride focused ski has a longer early rise and a longer turn radius than the ROAMr 100 and is perfect for that skier spending 70% of their time in the backcountry and 30% at the resort.

SIZE:	171 cm	178 cm	185 cm	192 cm
RADIUS:	21.8 m	23.6 m	25.4 m	27.4 m
WEIGHT: (single)	1.83 kg / 4 lb 0 oz	1.92 kg / 4 lb 4 oz	2.01 kg / 4 lb 7 oz	2.11 kg / 4 lb 10 oz

ROAMr 100

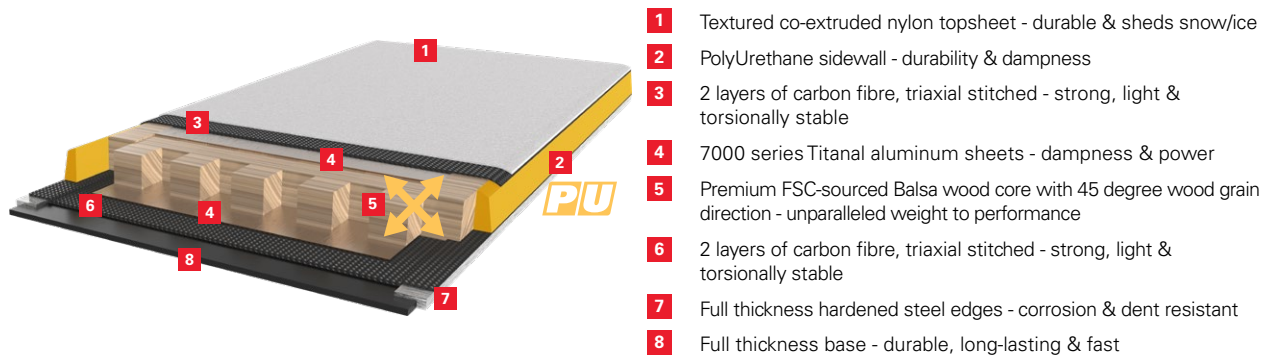

A one ski quiver built to ski in and out of bounds with ease. This playful ski is ideal for skiers spending around 30% of their time in the backcountry and 70% at the resort.

SIZE:	-	167 cm	172 cm	177 cm	182 cm	187 cm
RADIUS:	157 cm	167 cm	172 cm	-	-	-
WEIGHT: (single)	1.59 kg / 3 lb 8 oz	1.68 kg / 3 lb 11 oz	1.73 kg / 3 lb 13 oz	1.81 kg / 4 lb	1.88 kg / 4 lb 2 oz	1.93 kg / 4 lb 4 oz

SLAYr

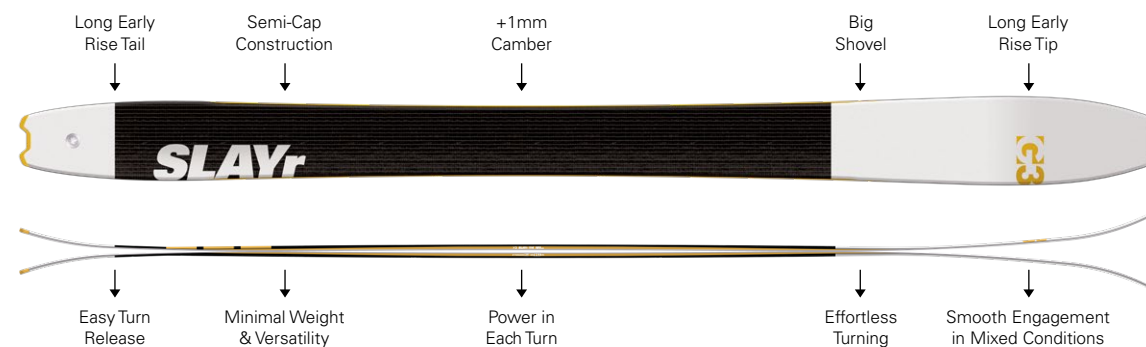

- Playful freeride performance at the lightest weight in its class
- Polyurethane sidewalls for best-in-class dampness **PU**
- Full carbon fibre construction creates a strong, light and torsionally stable ski
- Magnetic contact points hold skis together without a strap for faster transitions and less fiddle **M**
- Two tip-to-tail layers of titanal aluminum for dampness and power in every turn
- Ultralight custom wood core with 45 degree wood grain for unparalleled weight to performance **X**

FLAT CAMBER WITH EARLY RISE TIP & TAIL

The profile of the SLAYr is designed to be playful and easy to ski, yet stable at speed for big lines and aggressive skiing. The early rise in the tip and tail is drifts and fun while the flat to slightly positive camber underfoot retains power at high speeds.

SLAYr 114

The SLAYr is freeride skiing at its ideal balance of lightweight, playfulness, and downhill performance. Super easy and fun to ski regardless of skill level, this ski is equally at home on big lines in far-off locales as it is buttering through the local trees on a powder day.

143 / 114 / 128 mm					
SIZE:	-	178 cm	185 cm	190 cm	195 cm
SWI	172 cm	178 cm	-	-	-

pc: Jeremy Allen

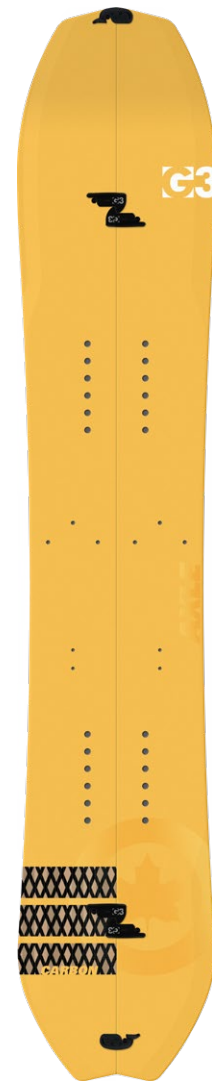

AXLE
SCAPEGOAT
SPLITBOARDS

AXLE

- All-mountain directional splitboard
- Playful and versatile shape to take on any backcountry condition
- Polyurethane sidewalls for best-in-class dampness **PU**
- Carbon fibre matrix adds torsional stiffness for better edge control

- 1 Carbon fibre matrix - torsional stiffness & improved edge control
- 2 Triaxial glass - torsion, flex & value
- 3 Poplar Paulownia wood core - lightweight & long lasting tuned flex
- 4 PolyUrethane sidewall - durability & dampness
- 5 Textured co-extruded nylon topsheet - durable & sheds snow/ice
- 6 Full thickness hardened steel edges - corrosion & dent resistant
- 7 Full thickness base - durable, long-lasting & fast

AXLE

The AXLE isn't just a split version of an all-mountain snowboard. Its progressive shape makes it THE one-board quiver created by backcountry splitboarders for backcountry splitboarding. The AXLE design ensures the skin to the top is as smooth as the ride down.

SIZE:	154 cm	158 cm	162 cm	166 cm
TIP:	292 mm	292 mm	292 mm	292 mm
WIDTH:	WHAIST: 255 mm TAIL: 290 mm	WHAIST: 255 mm TAIL: 290 mm	WHAIST: 255 mm TAIL: 290 mm	WHAIST: 255 mm TAIL: 290 mm
TAPER:	2 mm	2 mm	2 mm	2 mm
RADIUS:	8.5 m	9.1 m	9.8 m	10.5 m
WEIGHT:	3.09 kg 6 lb 12 oz	3.26 kg 7 lb 3 oz	3.39 kg 7 lb 7 oz	3.56 kg 7 lb 13 oz

SLIGHT CAMBER WITH EARLY RISE

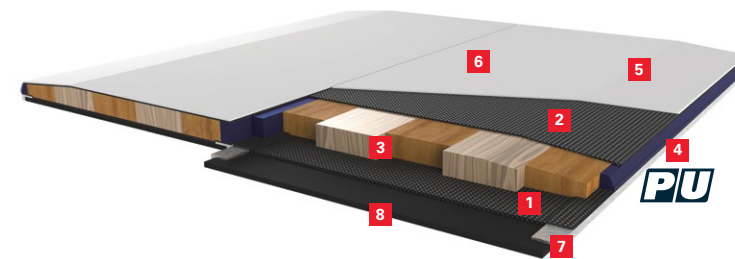

Built to be playful in the turn while remaining stable in variable conditions. The longer early rise in the tip and tail allows for smearability while the slight camber underfoot maintains stability and inspires confidence at speed.

SCAPE GOAT

- High performance splitboard designed for superior flotation
- Polyurethane sidewalls for best-in-class dampness **PU**
- Full carbon fibre construction creates a strong, light and torsionally stable ride

- 1 2 layers of carbon fibre, triaxial stitched - strong, light & torsionally stable
- 2 Biaxial stitched carbon fibre - strong, light & torsionally stable
- 3 Poplar Paulownia wood core - lightweight & long lasting tuned flex
- 4 PolyUrethane sidewall - durability & dampness
- 5 Stealth Razor Edge profile - reduces mass
- 6 Textured co-extruded nylon topsheet - durable & sheds snow/ice
- 7 Full thickness hardened steel edges - corrosion & dent resistant
- 8 Full thickness base - durable, long-lasting & fast

SCAPEGOAT

A powder slaying beast with a powder-specific rocker profile and 25 mm of taper in the tail for superior flotation. Its insanely light and responsive full carbon construction with PU sidewalls is ready for big days. Go as far and deep as you can.

SIZE:	158 cm	162 cm	166 cm
TIP:	310 mm	312 mm	313 mm
WIDTH:	WHAIST: 257 mm TAIL: 285 mm	WHAIST: 259 mm TAIL: 287 mm	WHAIST: 260 mm TAIL: 288 mm
TAPER:	25 mm	25 mm	25 mm
RADIUS:	8.2 m	8.7 m	9.4 m
WEIGHT:	3.06 kg 6 lb 12 oz	3.21 kg 7 lb 1 oz	3.34 kg 7 lb 5 oz

POWDER ROCKER

With camber under foot and a rockered tip, G3's Powder Rocker sinks the tail of the board to lift the nose high out of deep snow. Expect quick responsiveness in tight trees and an effortless ride without the leg burn.

SKI & BOARD ACCESSORIES

TENSION STRAPS

Super tough and flexible, even at cold temperatures, G3 Tension Straps are for more than just holding skis together.

More versatile and reliable than zip ties or duct tape, it's a good idea to always have a couple in your pack.

Shorter sizes are great for skis and other gear. Longer sizes are useful for lashing bulky items to your pack, roof rack or bicycle.

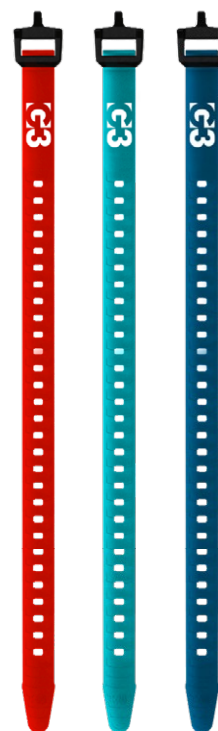

- Quick solution to fasten any two items together - skis, DIY projects, rooftop gear, etc.
- Available in three sizes - 400 mm, 500 mm, and 650 mm
- Durable fibreglass-filled nylon buckle
- 3 colours in each size - Universal Red, Grip Blue, and Glide Teal
- Available with individual packaging (all sizes) or bulk packaged (500 mm only)

TENSION STRAP CUSTOM PRINTING

Customize your G3 Tension Straps with your brand name or logo. We offer custom logo printing for all our Tension Straps when ordered in bulk. Ask us for details.

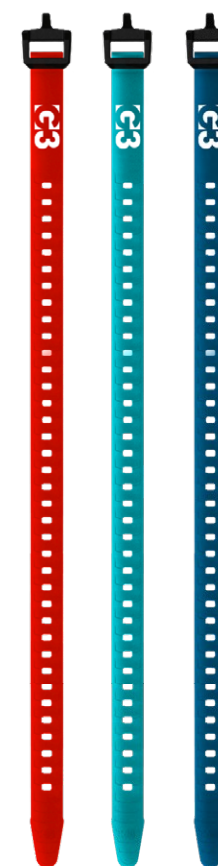

Minimum custom order is 500 straps, order in multiples of 100 (500, 600, 700 etc). Priced per 100 straps.

TENSION STRAP 400 mm

Small and compact. The 400 mm Tension Strap is ideal for cords, pvc, and smaller gear in the field.

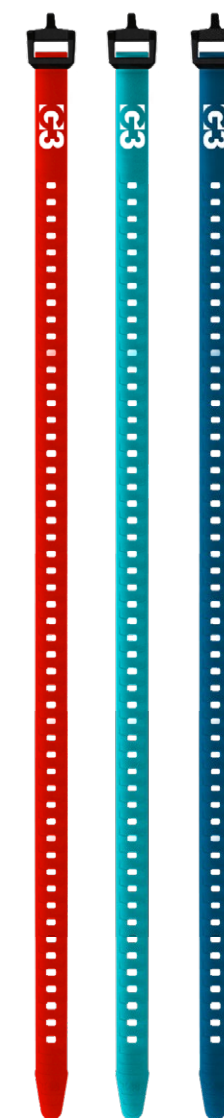

Colours: Red, Teal, Navy
Size: 16 in / 400 mm

TENSION STRAP 500 mm

The 500 mm Tension Strap is the go-to strap size for most needs in the backcountry or in the garage.

Colours: Red, Teal, Navy
Size: 20 in / 500 mm

TENSION STRAP 650 mm

The 650 mm Tension Strap is best for heavy-duty needs or to keep in the bottom of your pack just in case.

Colours: Red, Teal, Navy
Size: 26 in / 650 mm

WHY G3? | BINDINGS

G3 binding design focuses on simplicity, reliability, and performance yielding a superior binding with the most consistent and reliable release and retention. Our end goal is to provide a binding so seamless that you don't have to think about it - just step in with ease and get the most out of your backcountry experience. Power up then charge the descent with confidence.

ZED

Go lighter. Go further. Go hard. ZED bindings strike an ideal balance with their lightweight build, super easy-to-use feature set, and uncompromising downhill performance.

The ZED trims down the materials and design while still outperforming durability standards and expectations. It is perfect for any ski that will be used primarily in the backcountry. It's ideal for those skiers looking to trim even more weight with the option to easily add or remove brakes for specific missions.

LIGHTWEIGHT & FULLY-FEATURED

SIMPLE & INTUITIVE

NO COMPROMISES SO YOU CAN SKI HARD

ION

High performance in a proven platform. ION bindings are simple, intuitive, reliable, and durable. Updated for 22/23 the ION is refined with 8 seasons of testing and enhancements.

A skier may choose to go with an ION if they are an aggressive skier who plans to use these skis in and out of bounds. The ION features a stout build leading to long term durability. This robust design and engineering gives the binding more power to push big skis around either up or down the hill. You don't have to worry about the binding. Just ski, and ski hard.

RELIABLE & DURABLE

SIMPLE & INTUITIVE

POWER & PERFORMANCE

ZED

GO LIGHTER.

Starting with the proven platform of the ION, we looked at every part, every mechanism, and every screw to evolve the idea of a fully featured binding at the lightest weight possible. With the ZED we set out to define the next generation of lightweight high-performance touring bindings.

- 1 Single screw for full adjustment of vertical & lateral release
- 2 Simple, minimal Boot Stop for effective step-in guidance
- 3 Streamlined shapes maintain full performance at minimal weight

GO FURTHER.

As backcountry skiers, we focus on simplicity and efficiency to go further and do more in the mountains. With that same mindset we loaded the ZED with a full yet simplistic feature set that saves valuable weight and reliably has your back when you're deep in the mountains.

- 4 QuickFlick heel lifts are easy to manipulate with your ski pole
- 5 Heel turret can be turned in either direction for touring
- 6 Single tool simplicity with all binding mounts & adjustments (Pozi #3)
- 7 30 mm length adjustment on the heel to fine tune for each setup
- 8 Toe jaw strength clears excess snow every time they close
- 9 Anti-snowpacking features built into the toe and brake designs keep snow away and make for a confidence-inspiring step-in

GO HARD.

A binding can be light and simple for the hike up, but none of that matters if you can't ski it the way you want. The ZED truly stands confident in a league of its own with all the power and performance of a much heavier modern touring binding, but packs it into a super light and simple package.

- 10 Optimal toe elasticity for maximum energy absorption & minimized prerelease
- 11 Long range of forward pressure in the heel to maintain consistent release
- 12 Wide freeride mount transfers power to the ski & provides pull-out resistance
- 13 The wide center support of the turret and a metal wrap-around base transfer power and precision to the ski
- 14 Optional add-on brake is easy to install/uninstall
- 15 Compatible with the ION Crampon for icy ascents

UPDATED

ZED 12

Go lighter. Go further. Go hard. The ZED defines the next evolution of high-performance touring bindings.

7000 series forged aluminium toe for maximum strength to weight

Release values and springs dialed for powerful skiing and binding retention

Details and interaction optimized for technical users in demanding terrain

Optional add-on coiled cable leashes are easy to install and use with any ski boot. Includes coated wire boot connector loops. 14 g / 0.5 oz (single)

Optional add-on brake is **SUPER EASY TO INSTALL AND REMOVE**

30 mm length adjustment

5-12 RV

358 g / 12.6 oz (single, no leash, no mounting screws)

ZED 9

Fine-tuned for lighter users, the ZED 9 strikes an ideal balance of a lightweight build, easy-to-use feature set, and uncompromised downhill performance and safety.

Long carbon fibre reinforced nylon toe chassis balances strength, weight, and value

Release values as low as 3 inviting the next generation of skiers into the tech binding world

Specifically calibrated toe lever mechanism is easy to open and close for smaller users

Optional add-on coiled cable leashes are easy to install and use with any ski boot. Includes coated wire boot connector loops. 14 g / 0.5 oz (single)

Optional add-on brake is **SUPER EASY TO INSTALL AND REMOVE**

30 mm length adjustment

3-9 RV

345 g / 12.2 oz (single, no leash, no mounting screws)

UPDATED

ZED BRAKES

Set of 2 add-on brakes for any ZED binding. Easy installation or removal with a Pozi #3 screwdriver can be done at home, at the trailhead, or in the field.

85 mm 83 g / 2.9 oz (single)

100 mm 85 g / 3.0 oz (single)

115 mm 87 g / 3.1 oz (single)

130 mm 88 g / 3.1 oz (single)

ION

HIGH PERFORMANCE IN A PROVEN PLATFORM

The ION family of bindings is engineered to the highest performance standards. The optimal toe elasticity and forward pressure in the heel result in maximum energy absorption and consistent release during active use. The wide freeride mount transfers power to the edges, enhances torsional rigidity and provides superior pull-out resistance. Rigorous testing in the lab combined with real-world field testing by users pushing the limits on skis help us create the best performing bindings in their class.

SIMPLE & INTUITIVE

ION bindings feature fluid, efficient and confidence inspiring step-ins and transitions. The integrated BootStop aligns your boot toe for a quick, easy and consistent engagement. The QuickFlick heel lifts are easy to grab with your ski pole or hand while the omnidirectional heel allows you to turn the binding heel in either direction to lock for touring. The bindings have been built to require a single Pozi Drive #3 for all mounts and adjustments, reducing the number of tools you carry with you. The driving factor for these features when designing the binding was to have the best possible user experience every time you go skiing.

RELIABLE & DURABLE

You know a binding does its job when you don't notice it all day. The snow clearing channel allows easy ice and snow discharge preventing build up and unwanted prerelease. The brake is spring loaded and fully retracts giving a reassuring step-in and confidence in its ability to stop bigger freeride skis. The heel AFD (Anti Friction Device) ensures consistent release for all boots, independent of sole type. You don't have to worry about the binding. Just ski, and ski hard.

UPDATED

ION 12

The highest performing, most user friendly and most reliable tech binding for aggressive backcountry skiers. Refined with 8 seasons of testing and enhancements.

ZED DEMOTRACK

Simple add-on to modify any ZED binding to a demo or rental version. Replace the standard binding plate with this to receive 62 mm of binding travel allowing up to 7 mondo sizes of boot compatibility. Demo plate adds 30 grams in weight per side.

UPDATED

ION 12 DEMO BINDING ION 10 DEMO BINDING

Rental fleet convenience for the performance tech binding category. Quick, confident set up. One tool adjustability and no finicky boot spacer. 62 mm of binding travel allows up to 7 mondo sizes of boot compatibility.

Brake Options: 85 / 100 / 115 / 130 mm

BINDING TOOLS

SHOPTECH POZIDRIV #3 SCREWDRIVER

G3 bindings are built to work with a single tool for all adjustments - mounting, sizing, release values, etc. This is that tool. This stout Pozidriv #3 screwdriver is perfect for all adjustments and settings of G3's tech bindings.

POZIDRIV #3 DRIVER BIT

This 6 inch driver bit is ideal for demos or in the shop to make size adjustments super quick. Use this bit with your power driver or multi bit screwdriver.

BACKCOUNTRY BINDING TOOL POZI #3 & TORX T20

Stash it away in your pack for in-the-field binding adjustments and repairs. This tool has PoziDriv #3 on one end and Torx T20 on the other.

Pozi3 is the ski industry standard for binding mounts and the only tool necessary for all adjustments on G3 bindings.

Torx T20 is used by other tech binding manufacturers making this tool useful for all backcountry skiers.

SPIRAL MOUNTING JIG

Easy to use mounting jig for all G3 tech bindings. Includes hole patterns for standard and rental/demo bindings.

SKINS

WHY G3? SKINS

As the market leader in climbing skins we focus on a full line approach where every skier in any condition anywhere in the world has the perfect G3 skin to choose from. Every decision we make is focused on enabling the user to do more in the backcountry.

BEST-IN-CLASS PLUSH FABRICS

G3 develops premium nylon, mohair, and mixed plush materials to design the right solution for each backcountry user.

UNIVERSAL	GRIP	GLIDE	SPEED
Any location and all conditions. Universal nylon plush material is durable and versatile. Optimal balance of grip, glide, weight and durability.	Maximum grip and traction ideal for steep ascents and icy skin tracks. High-traction nylon plush material for durability and versatility.	All-purpose, go-anywhere skin built for cold and dry conditions with premium waterproofing. 65% mohair for optimal glide and 35% nylon for added durability.	Our fastest plush excels in cold and dry conditions. 100% mohair fabric with premium waterproofing increases glide and overall speed in the mountains.

UNRIVALED TIP & TAIL CONNECTION

The innovative, patented tip and tail connectors in all G3 skins create a lightweight, solid and reliable connection to your skis or board. The self-aligning hands fit easily on any shape, and the camming tails on all skins are super easy to attach and remove in any condition.

 SELF-ALIGNING HANDS Every G3 skin model features self-aligning stainless steel hands; offering a secure, lightweight connection on any ski shape. Patent US8474853	 EASY TRANSITIONS & BOMBER CONNECTION G3's low profile, elongated tail strap makes transitions fast and easy. The camming clip stays positioned on the ski or board, reduces wear and allows for easy adjustments.
---	---

RELIABLE ADHESIVE

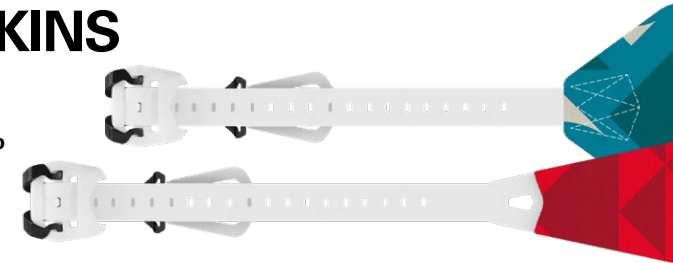

Climbing skin adhesive is best when you never notice it and it just works the way you expect it. So many variables can affect the way your adhesive performs, and we are constantly working to improve the product so it is prepared for any scenario. The adhesive used in all G3 skins features a refined formula engineered to let you do more laps and cover more terrain without having to worry about your skins.

 -30°C/-22°F ADHESIVE	 ECO-FRIENDLY INGREDIENTS

NEW FOR 2022/2023

IMPROVED TAILS ON MINIMIST & ESCAPIST SKINS

- Sizing holes added to the tail straps of all MINIMIST and ESCAPIST skins to improve the user experience
- Functionality similar to the tried and true ALPINIST tail strap
- Eliminates slippage thanks to the mechanical design
- Maintains the ultra lightweight design and materials

PFC-FREE WATER REPELLENCY ON ALL SKINS - INCLUDING MOHAIR!

- We introduced PFC-free (perfluorocarbon) waterproofing in our nylon skins in 2020
- We have worked to develop an option for all our mohair and momix skins to offer the same level of environmental stewardship without sacrificing performance
- This new waterproofing embeds itself into the fibres and wraps around every thread in the plush for superior protection and durability
- Better for the environment and for everyone who handles the skins by eliminating harmful C6 chemicals

NEW PLANT-BASED SKIN WAX

- Rub-on wax for application in the field in warm and variable snow conditions to repel water and prevent icing/clumping
- Includes eco wax, scraper, and zippered storage bag

 PLANT-BASED	 BIODEGRADABLE	 0% PETROLEUM

ALPINIST+

WHERE DOES GRIP COME FROM?

It's one of the seemingly endless questions we ask to challenge the status quo of climbing skin design. Skins that cover the entire base of your skis are overkill and heavy. Most of your skin's grip comes from just under the binding while fabric on the tip and tail creates unnecessary drag. Exposed ski base and alternative materials can significantly improve glide and efficiency without affecting that all-important grip.

NO MORE SNOW CREEP

The stiff material of the ALPINIST+ tip creates a rigid platform that keeps snow from creeping under the skin and extends the use of your adhesive.

EASY TRANSITIONS & BOMBER CONNECTIONS

G3's low profile, elongated tail strap makes transitions fast and easy. The refined camming clip stays positioned on the tail, reduces wear and allows for easy adjustments.

MINIMIST

UNCOMPROMISED PERFORMANCE AT AN UNRIVALED WEIGHT

The MINIMIST skins achieve an ultralight feel by using high performance textiles from other demanding sports applications as a backbone. This results in climbing skins that exceed the highest expectations for features and performance. Every MINIMIST skin is up to 30% lighter than anything else in its performance class.

COMPACT PACKABILITY

The MINIMIST skins pack small enough to fit into your jacket pocket. The low-bulk materials matched with the minimalist tip and tail system create a tightly packed roll that doesn't require any extra room in your pack.

PACKED VOLUME FOR 130 mm SKIN

CARBON INSERT REDUCES SNOW CREEP

During development of the ALPINIST+ skins we learned about the mechanics of how snow can creep under your skins and contaminate your adhesive. We were unwilling to step backward in these advancements in order to achieve lighter weight targets when designing the MINIMIST. Our solution? A carbon fibre insert at the tip of each MINIMIST skin, creating a directionally rigid platform that prevents snow creep and extends your time in the mountains.

UPDATED MINIMIST UNIVERSAL

Building on the strength of the classic ALPINIST, the MINIMIST Universal is the lightest, most packable fully-featured nylon skin in the world with unparalleled versatility, durability, and usability.

ESCAPIST

QUICK & EASY CUSTOM SETUP

The ESCAPIST is a fully customizable climbing skin. The user sets the length and trims the edges according to their skis. The setup process is super easy and doesn't require any tools other than the included G3 trim tool and a marker.

G3 SELF-ALIGNING HANDS

For the first time in a custom setup skin, the ESCAPIST features G3's patented self-aligning stainless steel hands to create a strong connection with any ski tip shape. Paramount to the ESCAPIST design, this feature brings G3's premium user experience and performance to a value line of skins.

SIMPLE SIZING & MERCHANDISING

With just two lengths per width, the ESCAPIST is a perfect solution to have on any ski wall so a retailer can be sure to cover their customers' needs with a high quality climbing skin.

SPLITBOARD⁺

ASYMMETRICAL TIP CONNECTOR

G3's trimmed down and minimalist splitboard skin tip connectors are inspired by our ski skins, but custom tailored for splitboards. The low profile, self-aligning stainless steel hand on each skin tip allows for a secure, lightweight connection on any board shape.

INNOVATIVE CAMMING TAIL CONNECTOR

Eliminating the need for difficult positioning and hard pulling to affix the tail strap, the SPLITBOARD+ tail connector features a straight edge to line up on your board and a simple camming clip that requires very little effort and will hold the tail strap in place with confidence.

PRE-CUT STRAIGHT EDGE

The tip and tail connections and the straight edge of the skin fabric are all built to naturally align with your board out of the box. You only need to trim the shaped edge of the skin to dial in a custom fit.

FLEXIBLE SIZING WITH GENEROUS OVERLAP

The sizing curve for the SPLITBOARD+ skins reflects real user needs and positions the most popular board lengths in the middle of a size. The S/M and M/L skins overlap for 8 cm allowing splitters who fall within that range a choice to have more skin fabric for additional coverage or less material for weight savings.

M/L	140 mm	154-172 cm	275 g / 9.7 oz

UPDATED SPLITBOARD LT GUIDE

The splitboard skin to beat. The ideal all-purpose, go-anywhere skin built for cold and dry conditions. Features a mix of mohair for optimal glide and nylon for added durability.

S/M	140 mm	144-162 cm	241 g / 8.5 oz
M/L	140 mm	154-172 cm	262 g / 9.2 oz

SKIN ACCESSORIES

MAINTENANCE & SETUP

NEW
PLANT-BASED CLIMBING SKIN WAX & SCRAPER KIT

Rub on wax for application in the field in warm and variable snow conditions to repel water and prevent icing/clumping. Made entirely out of plants so you don't need to worry about what you are leaving behind.

Biodegradable | 0% Petroleum

Plant-based | PFC Free

60 g / 2.1 oz

Includes wax, scraper & storage bag

GLUE RENEW

An easy way to recondition climbing skin adhesive with G3's updated formula.

FULL SHEET
210 cm long x 140 mm wide
ROLL 50 yd roll
45.75 m long x 140 mm wide

TRIM TOOL

The G3 trim tool makes skin trimming lightning quick and easy by always delivering the perfect edge reveal without having to reposition the skin once it is applied to the base of the ski.

WATERPROOF RENEW

G3's Nano-tech Climbing Skin Waterproof Renew spray for at-home application creates a unified, flexible, and environmentally friendly layer that repels water from the skin fabric and prevents icing. Compatible with any nylon or mohair skins.

Made in Canada

60 ml / 2 oz

STORAGE IN THE FIELD

LOVE GLOVE

Faster and easier than traditional skin savers for quick transitions in the field, this intuitive spandex sack wicks moisture from your skins and keeps your gloves free of glue & gunk. Note: designed for field use, not for long-term storage.

UPDATED

SKIN BAG

G3's skin bag is made of recycled materials. It is simple, lightweight, and secure so you can use it to store your skins or anything else you want with you into the backcountry.

310 x 160 x 60 mm

LONG TERM

SKIN SAVERS

Maximize the life of your skins by protecting and preserving the glue. Great solution for long term and off-season storage.

CONNECTORS

ESCAPIST TIP KIT

Accessory tip kit featuring G3's patented self-aligning stainless steel hands for a secure connection to any ski shape. Easy to setup for a custom fit using any skin fabric. Sold as a pair.

SPLITBOARD+ TAIL CLIP

Tail connector for any G3 splitboard skins featuring a straight edge to line up with your board and a simple camming clip that requires very little effort and will hold the tail strap in place with confidence. Sold as a pair.

TWINTIP & SPLITBOARD CONNECTORS

A reliable, foolproof tail attachment for all twin tip skis or snowboards.

TAIL CLIPS

Reliable and secure over-centre camming tail clips. Seamlessly integrates with all G3 ski skins.

TIP & TAIL CONNECTOR KIT

A tip and tail connection kit for any type of climbing skin. Tip loops available in S, M or L. Assembly required.

TAIL CONNECTOR KIT

Stand-alone tail connection kit for any type of climbing skin. Assembly required.

VIA & FIXIE

TRAVERSE GRIP

The rubberized, extended grip on every VIA and FIXIE pole is lightweight and provides unlimited options for grip location along the top of the pole. It acts as an added layer of insulation against cold poles with your bare hands. The side hill bump increases stability for those technical sections of a traverse where you need to use more body weight and have something to push against.

SOFT & LIGHT REMOVABLE STRAP

Comfort and weight are paramount for these easily adjustable wrist straps. The clip makes it super easy to remove your straps for backcountry skiing or tree skiing, and the form-fitting material wraps and supports the hand, evenly distributing weight across your palm.

RELIABLE CONNECTION

The burly forged aluminum lever with a simple and easy-to-use, offset cam gives you a reliable and sturdy connection between pole sections. Lever is positioned so passing branches and obstacles cannot accidentally open the mechanism.

ALL-MOUNTAIN BASKET

The redesigned all-mountain basket is the perfect size (85mm) and shape to tackle any snow condition and is especially suited for steep and technical terrain. The material is just the right stiffness to allow you to manipulate your bindings on the way up while maintaining smooth movement through the snow on the descent.

VIA CARBON

THE premier carbon pole for technical users looking for a lightweight yet fully featured tool with a feature set built for the backcountry.

Now lighter than ever with its ergonomic foam grip.

Soft and comfortable foam grip with dual density plastic upper for precision

Extended utility tab for binding heel lifts, boot buckles, and more

Upper Shaft: 18 mm Carbon Fibre

Lower Shaft: 16 mm Carbon Fibre

	Length	Weight
SHORT	95-125 cm	219 g / 7.7 oz
LONG	115-145 cm	259 g / 9.1 oz

VIA

The lightweight and exceptionally durable VIA is packed with features designed for backcountry use and built to outlast the demanding abuse of mountain travel.

Ergonomic dual density plastic grip shaped for comfort

Quickflick Utility Tab to flick heel lifts or buckles

Upper Shaft: 18 mm 7075 Aluminum

Lower Shaft: 16 mm 7075 Aluminum

	Color	Length	Weight
SHORT	Teal	95-125 cm	268 g / 9.5 oz
LONG	Navy	115-145 cm	312 g / 11 oz

FIXIE

This stout one-piece pole is equally at home in bounds as it is in the backcountry. Its simple build includes a feature set trimmed down to the necessities of uphill travel and downhill performance.

Ergonomic dual density plastic grip shaped for comfort

Quickflick Utility Tab to flick heel lifts or buckles

18 mm Aluminum shaft

	Length	Weight	Length	Weight	Length	Weight
SHORT	115 cm	255 g / 9 oz	120 cm	267 g / 9.4 oz	125 cm	272 g / 9.6 oz
	130 cm	275 g / 9.7 oz	135 cm	281 g / 9.9 oz		

PIVOT

SECURE PACKING

Optimized user experience comes from the finishing details in any design. PIVOT poles wrap around the handle and lock into place when packed, making it super easy to fit into your backpack or cleanly attach them to the outside. This nesting feature gives a secure finish when packed which is ideal for splitboarders and for travel.

LIGHT & STRONG

The lightweight aluminum construction of the PIVOT is engineered for strength and durability. The design of the poles improves on stiffness and power over other folding poles for a stronger downhill performance when needed.

AN ESSENTIAL PART OF YOUR TOOLKIT

The PIVOT is built for the different needs of splitboarders in regards to bindings and transitions when skinning. The extended utility tab at the nose is the perfect tool for manipulating your bindings on the fly with a shape that allows for the pushing or pulling specific to splitboard bindings.

The PIVOT TREK is perfect for summer trekking using the same handle to get through rough terrain and smooth trails alike.

GRIP DESIGNED FOR COMFORT & UTILITY

PIVOT poles feature an extended soft and comfortable foam grip with a dual-density plastic upper for precision in grip and handling. The extended foam and the yellow rings along the shaft make it super easy to select more than one hand position when traversing. The rings also speed up transitions by giving something to pull against when locking the pole into place.

PIVOT

The PIVOT features superior packability and strength combined to create the ultimate packable pole for splitboarding and backcountry travel.

Light & strong folding splitboard pole

Upper Shaft: 18 mm 7075 Aluminum

Lower Shafts: 16 mm 7075 Aluminum

SHORT	105-125 cm	297 g / 10.5 oz
LONG	115-135 cm	307 g / 10.8 oz

PIVOT TREK

Durable folding trekking pole with superior packability and strength. Wraps flat and locks with magnetic closure for fast and secure packing.

Light & strong folding trekking pole

Upper Shaft: 18 mm 7075 Aluminum

Lower Shafts: 16 mm 7075 Aluminum

SHORT	105-125 cm	287 g / 10.1 oz
LONG	115-135 cm	297 g / 10.5 oz

POLE ACCESSORIES

PIVOT TREK MAGNETIC BASKET

Magnetic trekking basket set to adapt G3 PIVOT poles for summer trekking. Strong magnets in the basket cutout attach securely to the upper section of the PIVOT poles when wrapped and stowed for that same compact finish you are used to.

*Compatible with all PIVOT poles 21/22 and later

ALL-MOUNTAIN BASKET

The all-mountain basket is the perfect size (85mm) and shape to tackle any snow condition and terrain type. The material is just the right stiffness to allow you to manipulate your bindings on the way up while maintaining smooth movement through the snow on the descent.

REPLACEMENT STRAPS

Backup or replacement lightweight and comfortable pole straps. Compatible with all G3 poles.

Comfort and weight are paramount for these easily adjustable wrist straps. The clip makes it super easy to remove your straps for backcountry skiing or tree skiing, and the form-fitting material wraps and supports the hand, evenly distributing weight across your palm.

POWDER BASKET

100mm diameter. This large pole basket's unique shape serves as a tool helping to engage binding heel lifters while ski touring, and maintaining plenty of float through deep snow while skiing.

RESORT/TREKKING BASKET

G3's in-bounds basket. Perfect for setting up your poles for use at the resort or for summer trekking use.

FLEX TIP

Replacement tip for G3's VIA Carbon lower shaft - past or present version of the pole.

POLE LOWER SECTION

Replacement lower shaft, with guide plug inserted in the top, and ferrule attached at the bottom. Basket not included.

AVI & SPADE SHOVELS

AVI

The AVI remains the choice for those who want a reliable tool in case of a backcountry emergency, as well as an easy to use tool for all snow study needs. Available as powerful D-grip or lightweight T-grip handle.

- Maximum strength
- Shaft grip makes digging faster and more comfortable
- Flat blade surface for snow study use
- Telescoping shaft
- Slotted blade for rescue sled construction

730 g / 1 lb 10 oz (T-Grip)

770 g / 1 lb 11.2 oz (D-Grip)

PACKED LENGTH 46 cm / 18 in

BLADE WIDTH 24 cm / 9.5 in

BLADE LENGTH 26.5 cm / 10.5 in

6061 T6 aluminum blade, TIG weld

SPADE

Compact and light. The SPADE's rounded leading edge, compact blade design, and T-grip handle make it a tool for more than just moving snow.

- Rounded leading edge easily penetrates consolidated snow
- Shaft grip makes digging faster and more comfortable
- Low profile blade for easy packing
- Maximum strength
- Telescoping shaft

630 g / 1 lb 6.2 oz (T-Grip)

670 g / 1 lb 7.6 oz (D-Grip)

PACKED LENGTH 46 cm / 18 in

BLADE WIDTH 20.5 cm / 8.1 in

BLADE LENGTH 25 cm / 9.8 in

6061 T6 aluminum blade, TIG weld

BONESAW & CORD

BONESAW

The G3 Bonesaw is streamlined, packable, lightweight, easily extendable and tough enough to cut through bone, wood, and ice. It features slots for easy attachment to your ski pole or shovel shaft and includes a lightweight sheath and a 400 mm Tension Strap.

TOTAL LENGTH 47 cm / 18 in

CUTTING LENGTH 35 cm / 14 in

169 g / 5.9 oz

Hardened stainless steel

RUTSCHBLOCK CORD

An innovative snow study tool, the G3 Rutschblock cord makes testing quicker and easier to effectively study snow stability. It features a lightweight and durable cable, low profile swage springs that can slice through snow and ice, and large loop handles that work with gloves and mitts.

5.75 m / 18 ft 10 in

Coated stainless steel cable

VINYL DIE-CUT LOGO STICKERS

Simple stickers that have a big impact. These die-cut vinyl stickers showcase the G3 logo anywhere you want to stick it. 2 sizes: 12.5 cm / 5 in, 6.2 cm / 2.5 in 2 colours: Red, White

WHITE ON RED LOGO STICKER

Updated to be as clean and simple as possible to reflect the modern G3 brand, these vinyl stickers are a great way to show your backcountry roots on all your other gear. 6.2 cm / 2.5 in White logo on red sticker
